### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art made of record fails to disclose or suggest a battery state estimator having at least a first I-V characteristic storage means for obtaining the I-V in a first state as a currently used state, a second I-V for storing previously a second I-V where the extractive energy is smaller than the first state, a battery voltage calculation means with specified load for calculating a first battery voltage when the current is at the specified load current by using the first I-V storage means and calculate a second battery voltage using the corresponding scenario and charging state arithmetic operation means for calculating a charging state in the first state by using the first and second voltages calculated above.

Another scenario takes into account a third I-V characteristic.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to the Examiner at the below-listed number on every Tuesday, Thursday and Saturday.
